Summary

Full Stack Web Developer eager to hone his skills and learn new skills and technologies. Experienced with working in a team environment and communicating ideas to others.

Technical Skills

Front End: HTML5, CSS, Javascript, React.js, Bootstrap, Bulma, jQuery, Handlebars.js
Back End: Node.js, Express.js
Database: MySQL, Sequelize, MongoDB, Mongoose, GraphQL

Projects

Freelancer
- A job service application that would allow users to offer their skills and pay for others'.
- Led a team of developers to develop features following a deadline. Connected the Front End and Back End together, implemented responsive design to the application, and helped the other developers with their tasks. Implemented React-Bootstrap and JSON Web Tokens for the first time.

RPG Character Database
- Allows users to create, comment on, and delete role-playing game characters.
- Created the Front End and implemented Handlebars.js for the first time, keeping responsive design standards in mind.

PokeFinder
- An application that would allow users to offer their services and pay for others'.
- Led the team in figuring out logic for Javascript functions, refactoring redundant code, and implementing an API and responsive design using Bootstrap and CSS.

Education

Rutgers University - *Fullstack Coding Bootcamp*   May 2022
- Focused on the MERN stack (MongoDB, Express.js, React.js, Node.js)
- Learned by creating applications that solved real world problems.

Experience

Samsung Express Inc.   June 2020 - May 2022
Executive Assistant   Palisades Park, NJ
- Assisted in overseeing operations and
- Liaised and translated for company president
